

QFP CARRIER TAPE

A safer and more efficient method of storing, transporting, handling and machine loading quad flat packs than the conventional tray method.

1. Fits standard 16, 24, 32, 44 and 56 mm tape feeders.
2. Tape complies with EIA 481 and IEC286-3 standards.
3. Each component is held by the body and top sealing tape into it's own custom designed compartment.
4. Pins do not come into contact with any part of the tape.
5. Tests for shock and vibration confirm no component or pin movement (independent test).
6. Quantity of devices per reel can vary between 100 to 2000 dependent on size of component.
7. Pin count from 40 through to 208 can be taped.
8. "On Line Costs" estimated at 15% of the cost of tray fed QFP's.
