CLC63 Component Cropper

The Reel Service CLC63 Component Cropper uses a completely enclosed cutting area providing a safe, simple-to-use cropping solution to crop a wide range of component leads including radial, TO transistors and many other loose leaded components.

Leads are easily cropped by placing them through the standard lead-pitch holes or long slot on the top plate. Pressing the foot pedal operates an air actuated guillotine blade to provide precise burr-free cutting of component leads to standard 3.0mm length, or other customer specified length via custom top plate. Lead trimmings are collected in the removable catch bin.

The CLC63 uses a hardened guillotine blade with 2 cutting faces. A simple change over allows the other face of the blade to be used, providing longer use of the blade between sharpening re-grinds.

DIMENSIONS:

W-140 x L-320 x H-90 mm

DIMENSIONS:

7.15Kg

FEATURES

- Ideal for cropping component leads including radial, TO transistors and many other leaded components.
- Can cut multiple components simultaneously
- Precise burr free cutting
- Pneumatic control via foot pedal (60 PSI clean, dry air)
- Includes standard configuration top plate with hole pitches for standard components. Cropped lead length 3.0mm
- Custom top plates available to suit customer specified lead pitch and lead length
- Removable catch bin to collect trimmed leads
- Wide rubber feet stop the base moving during operation. Can also be secured to a table using the mounting holes provided.
- Rigid all metal construction with a wide, sturdy base.

Includes

- Cropper with double-side guillotine blade
- Lead trimming catch bin
- Standard top plate
- Foot Pedal
- Air tubing

Options

- Custom top plate to suit customer specified lead pitch & final cropped lead length
